

## BENOCS Analytics services now available over the NL-ix platform all over Europe

**Berlin, Germany, 25 November, 2020** – BENOCS GmbH and NL-ix announced that the Hosted BENOCS Analytics Service is available over the NL-ix platform. The Service is now available from the close to 100 European NL-ix enabled Data Centers.

BENOCS hosted services provides customers with detailed network analytics backed by powerful data. This state-of-the-art tool gives customers full traffic flow visibility spanning multiple dimensions across the entire internet supply chain. Thus, allowing them the ability to easily spot new business opportunities, network abnormalities, and much much more.

“By connecting to the NL-ix network, we immediately spread our service all over Europe, making it available in all of the datacenters that NL-ix is in. At the same time, the ultra-low latency character of the NL-ix platform enables us to guarantee the best possible quality of our hosted services anywhere in Europe”, stated Stephan Schroeder, BENOCS CEO.

For NL-ix customers this means the BENOCS Analytics services is, via a simple additional VLAN, available over an NL-ix port, thus saving costs on installation and patches. Jerry Grondel, NL-ix Technical Product Manager states: “The BENOCS service is another example of a SaaS application that uses NL-ix to fan-out over Europe, providing a great service with a value beyond the NL-ix network.”

### **ABOUT BENOCS**

BENOCS GmbH – a spin-off of Deutsche Telekom – is a small company with big plans to revolutionize the way network traffic is managed. Their intelligent and fully automated solutions fit networks of any size and provide ISPs as well as CDNs strategic ways of coping with growing network traffic. With BENOCS Analytics, network operators, transit and wholesales carriers, Hosting and CDNs gain end-to-end visibility of their entire traffic flows. [www.benocs.com](http://www.benocs.com)

### **ABOUT NL-ix**

NL-ix is Europe’s most experienced and one of the largest geo-dispersed interconnect exchanges worldwide, combining one of the world’s leading internet exchanges with a full portfolio of network, cloud and data center interconnection solutions. By leveraging NL-ix neutrality and transparency via a range of innovative tools, our customers can own, scale and orchestrate their interconnections locally, regionally, or across Europe. ### **NL-ix Network Performance**

NL-ix offers international transit and interconnection services as well as local peering. Unlike other transit providers, who offer a ‘black box’ connection, which is often tied to an indirect or bottle-necked route, NL-ix publishes [real-time latency figures](#) for all routes on its network as well as providing customers with tools to limit the networks they interact with through an

online Route Server Configurator
